

CUE PATCH NOTES

Version 1.15.36 – February 8th, 2016

CUE 1.15.36 is the latest release for our RGB line of peripherals and contains a multitude of changes and enhancements.

Fixes / Improvements

- Resolved a critical connection issue with Scimitar when lighting is enabled (this fix also requires FW 2.01 for Scimitar).
- Resolved a rare issue that causes CUE to crash when modifying a selected key under advanced settings.
- VOID Wireless will no longer automatically turn on sidetone if it has been disabled in CUE/
- Resolved an issue with DPI LED colors with duplicate files.
- Resolved a critical connection issue with Scimitar when lighting is enabled. (This fix also requires FW 2.01 for Scimitar).
- VOID USB and Wireless RGB Headsets now support Active Voice Notifications! To enable this new feature, connect your headset and select the Settings Tab -> Devices Tab:

- Resolved other minor bugs and issues.

Important Notes

Please ensure your Scimitar device is updated to FW 2.01 with 1.15.36. Once your Scimitar device is updated, it will no longer be compatible with previous versions of CUE.

During a firmware or software update for any Corsair peripheral, CUE may need additional components and time from a Window's Driver Software Installation to complete the process.

If you have to abort at any part of the process, simply reconnect the device and select Update Firmware from the Devices -> Settings Menu, and choose "Force Update from Server" to re-initiate the update.

Keyboard Connectivity

Connecting via USB 3.0:

Connecting via USB 2.0:

Use one connector (the one with the keyboard icon) when connecting via USB 3.0

Use both connectors when using USB 2.0.*

* Plug in the connector with the two arrows icon first, and the connector with the keyboard icon second.
