By: US Diversified Tech, LLC Nashua, NH USA

Portable Memory Lock™

- It all starts when you download and install this important security tool.

- It all starts when you download and install this important security tool.

- Portable Memory Lock is the result of listening to what our customers needed in a memory device management tool.

- An ideal solution designed to assist your company or agency meet privacy laws, State or Federal regulations that require data protection.
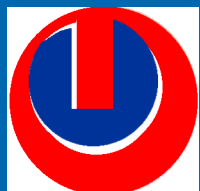

Portable Memory Lock™

➤ Block all unauthorized portable memory drive connections at machine level.

➤ Unrestricted use of non-memory devices (keyboard, mice) allowing these devices to operate normally.

➤ Machine level & management level password/token access.

➤ Ideal solution to support written security policies.

➤ Logs files transferred to USB Flash drives from protected PC.

➤ Provides data protection for files stored on flash drives.

Portable Memory Lock™

➢ Installation - Takes less then 15 minutes

➢ Download, save and extract zip. Save to C drive.

➢ Our Free 15 day Trial is the same as the final version.

➢ If you select to purchase, an Activation Key will be emailed to the email address you provide.

➢ We provide free tech support for the Trial and permanent license.

Portable Memory Lock™

➢ One of the first things you'll be asked is to create and enter a password. Make sure to record and store your new password in a safe location.
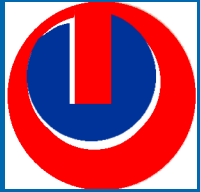

Portable Memory Lock™

We have installed a simple, easy to use control panel that is managed at the PC/machine level. To open the panel, click on the PML icon. This is found on lower right hand side task bar on your monitor. Once opened just click padlock icons to lock or unlock sectors.
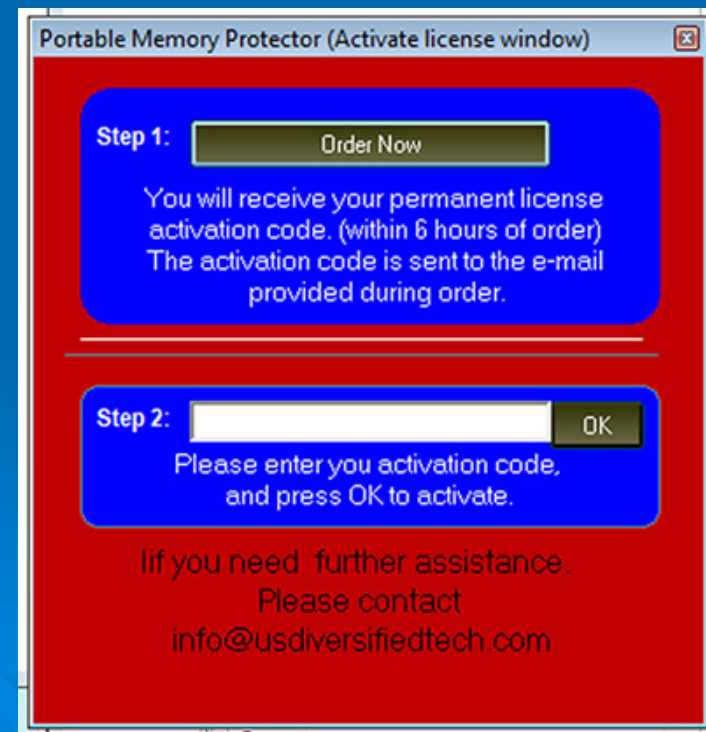

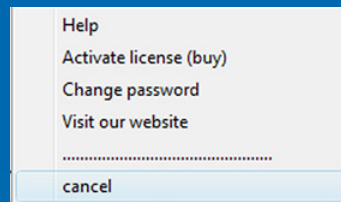

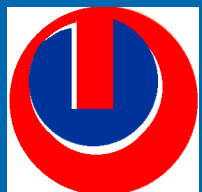

Portable Memory Lock™

Clicking on PML icon on the top left hand corner of control panel will open order and activation box.

Either click Order Now or if you have received Activation Code enter it here.
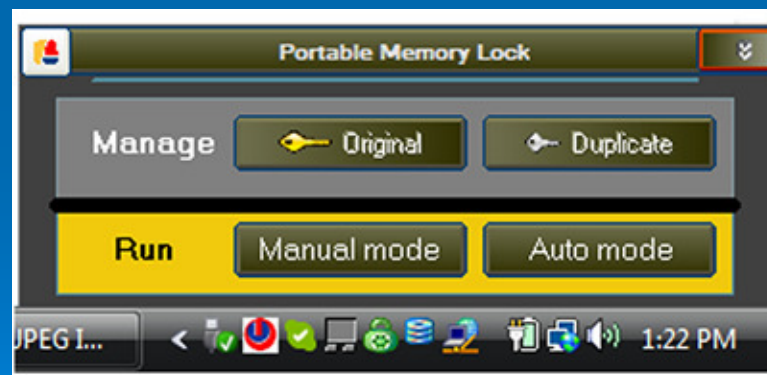

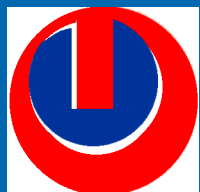

Portable Memory Lock™

Access the control using manual password mode or create a user and a management USB token key.

Once a user token is inserted it will unlock all locked sectors.

Management token allows one token to be used to manage all PC's using Portable Memory Lock™.
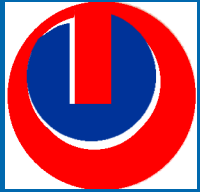

Portable Memory Lock™

Protect files and folders placed on memory device.

Place our file protection tool on your USB Flash drive by inserting the drive into USB port and clicking the "portable" button on control panel. Open the protector using password, then drag and drop file into USB image to protect or unprotect.
